In Drivers / OnyxxNetwork / EdgeIO / Points:

Create an AND from all Zone*n*Command.Out to ensure that all are called for.
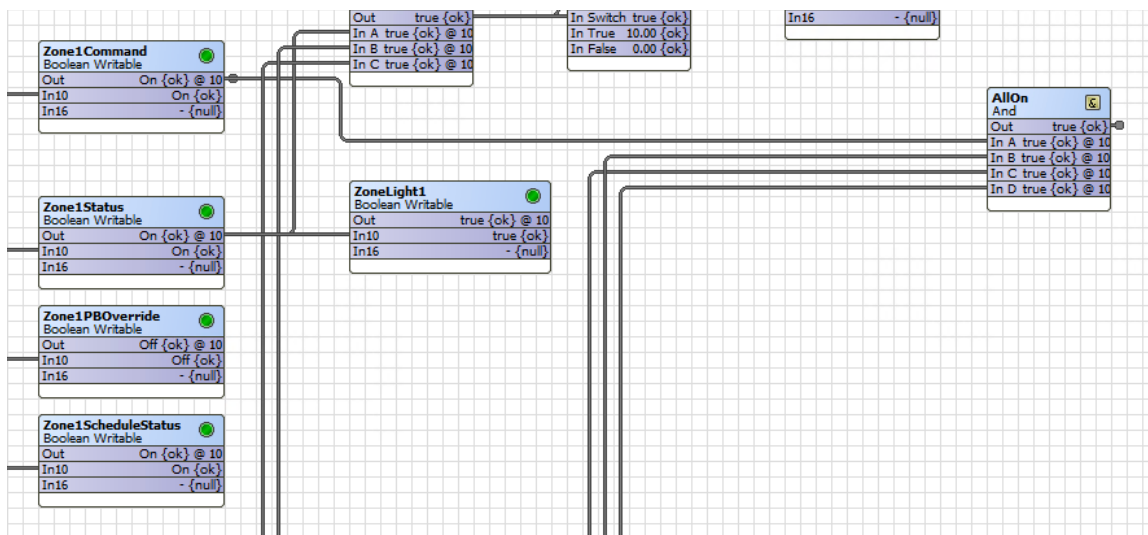

In Drivers / ModbusAsyncNetwork / Scout*n* / Points:

Create another AND which is linked to from NumberMeters.Out (or the identically-placed GreaterThan in successive Scouts) as well as the just-created AND in OnyxxNetwork.

Link its output to the NumericSwitch.In Switch that NumberMeters.Out used to link to.
